# Strata Electro PL lens clearance

For establishing compatibility with Strata Electro PL lens mounts, a lens fitment tool is included.

The tool is also available separately by request from KipperTie. Alternatively you can print and cut out your own using the below guide.

Please ensure that your printer is reproducing the drawing accurately by comparing the ruler scale. Adjust scaling if necessary before cutting out.

Checking clearance with a tool

PL lens clearance tool

When assessing a lens, ensure that you have paid attention to the full extent of movement of the rear element when focussing. Turn the focus ring to its fullest extents to be certain. Mistakes made in this regard can damage both glass and mechanical components.
